

A template for writing a paper

Norah Jones John Hamm

2023-03-29

The abstract serves both as a general introduction to the topic and as a brief, non-technical summary of the main results and their implications. Authors are advised to check the author instructions for the journal they are submitting to for word limits and if structural elements like subheadings, citations, or equations are permitted.

Table of contents

Small doc section.	1

Small doc section.

 Note

This is a small section with some recommendation and examples.

citations

Cite doi or name in bibtex. you can export them from Mendeley or Zotero to resources/bibliography.bib

[1, 2].

MacFarlane [1] says something about the subject. (makes sense only with author name style)

Section

Figures

During drafting I suggest to put many panels in a multi figure.

Figures should be saved in figures/ and should be ideally in svg format. Png works too but less for pdf conversion. svg can directly be compiled to pdf <https://quarto.org/docs/prerelease/1.3/pdf.html>

(a) legend for sub figure 1

(b) legend for sub figure 2

Figure 1: Finally all the text would be in a single caption but during the drafting it is easier to have it in each sub figure. The space after this line is very important!!

i Note

Apparently multi-panel figures are not working properly in docx (who would have thought) It worked before using quarto 1.3.0 and will work again in 1.7 <https://github.com/quarto-dev/quarto-cli/issues/9623>

Ref whole figure with Figure 1 Ref panel with Figure 1b

The advantage is that if we change panels e.g. main figure/ supplementary figure the numbering will be updated automatically.
